Born and raised in Johannesburg, South Africa, I have been working in the Advertising industry as an account executive for a while but have been drawn to Web Development. After studying Computer Science online for the last year, I was able to fast track my learning and complete many online Certifications due to quarantine, including responsive webdesign and JavaScript Certifications at freecodecamp.org. representing 300 hours per certification.

I am still in the process of obtaining more certifications as i aim to learn more about full stack development.

## Skills

Javascript
